Experiences

Smeetz, Product Designer (Product at the start of 2026)

AUGUST 2024 - Now , Switzerland

AI-Powered Product Operations: Designed and implemented an AI-assisted workflow (Claude + Figma) enabling **7** PMs to independently ideate, prototype, and ship within brand and design system guidelines, reducing design cycle time by **70%** and significantly increasing feature quality and output velocity.

Revenue-Driven Prototyping: Led end-to-end **+15** customer discovery and feature validation, from user interviews to executive pitches directly contributing to upsells and new client acquisition generating **+€70K MRR**.

Product Engineering: Built the company's Changelog platform from scratch, centralizing product knowledge across Product, Engineering, and Sales teams. Also contributed as a Design Engineer on the Developer Portal, bridging design details and frontend implementation driving an early **~30%** reduction in developer support tickets.

3M Zone, Product Designer

JULY 2023 - JULY 2024 , Algiers

Managed end-to-end design for 3 platforms and set up design systems and processes.
Conducted stakeholder/user interviews, analyzed heatmaps, and iterated designs.
Presented prototypes, aligned teams, and supported task and workflow management.

Finnetude, Product Designer

JAN 2023 - JUIN 2023 , Algiers

Led full design lifecycle from research to prototyping, testing, and delivery.
Designed a banking app prototype now in development based on client validation.
Collaborated with stakeholders to translate business needs into product features.

Goubba, UI/UX Designer

JUIN 2022 - SEPTEMBER 2022 , Algiers

Implemented atomic design structure and component anatomies in the design system.
Built responsive components improving consistency across mobile and web.
Boosted team efficiency by 20% through reusable components and workflows.

Skills & tools

Claude CLI/Design, Cursor, User Research & Usability Testing, Wireframing & Prototyping, Design Systems & Atomic Design, Interaction & UI Design, User Flows & Journey Mapping, Accessibility (WCAG), Data-Informed Design (Analytics, Heatmaps), Figma (Components, Auto Layout, Variables), FigJam / Miro (Workshops, Ideation), Collaboration with Developers &

Product Teams, Agile / Scrum Workflow, Design Documentation & Handoff, A/B Testing & Iteration, Basic HTML/CSS Understanding, AI-Assisted Design Workflow

Languages
Arabic, English, French.

Education

Ms Software Engineering

SEP 2018 - JUIN 2023

University of Science & Technology Houari Boumediene, Algiers.
